## SKILLS

C#

.NET

React

Git

Typescript

Angular

HTML/CSS

## PERSONAL QUALITIES

Quick to learn

Ambitious

Adaptable

Committed

Creative

Independent

## ABOUT ME

I have a passion for learning new skills and mastering them. I am creative and committed, with a flair for problem-solving and an interest in programming. I quickly absorb new knowledge and skills for use in practical contexts. I enjoy collaborating with others, as well as working independently. I am very family-oriented—I come from a large family myself, and I have a partner as well as a daughter who was born in 2024.

## EDUCATION

**TEC Ballerup**
March. 2022 -
Software Development Apprentice

## EXPERIENCE

**Abacus Medicine - Programmer (Apprenticeship)**
January 2023 - January 2024
At Abacus Medicine, I worked on their internal trading platform.
The trading platform was built on .NET and primarily used C#, Visual Basic, and TypeScript. Most of my work there involved:

- Refactoring and optimizing code
- Writing unit tests using xUnit, Moq, AutoMoq, and FluentAssertions
- Onboarding new employees to our system and assigning them tasks suited to their skill level

**Ramundberget Ski Resort – Chef Apprentice**
2018 - 2019
I trained as a chef at a ski resort in Sweden. The job required being constantly ready to solve the many problems that arise in a kitchen. I learned to work quickly and efficiently under pressure, to be structured and organized both inside and outside the kitchen, to maintain good collaboration with my colleagues, and to push myself in order to create a better-functioning workplace.

## HOBBIES AND INTERESTS

Programming | Football | Cooking | Gaming
